Product Description

Camera Module CSI-2 with 2592 x 1944 Resolution

The OKdo CAM-OV5647 is a low-cost fisheye lens and wider field view camera module. It connects via a ribbon cable to the CSI connector on the Raspberry Pi. The video and still image quality is better than a USB webcam.

- Wide angle camera module
- Relative illumination is 52%
- Type: Camera module
- Supported Video Ports: Raspberry Pi
- Number of channels: 1
- Supported bus interfaces: CSI-2
- Maximum supported resolution: 2592 x 1944
