Product Description

USB Type-C Docking Station for Mobile Devices 4K - HDMI/Hub/LAN/PD 3.0 with LED illumination

This docking station by Delock can be connected to a mobile device with a USB-C DP Alt Mode or Thunderbolt 3 port and provides a variety of interfaces. One monitor can be operated at the HDMI output. Three built-in USB ports allow the use of peripherals. The Gigabit network port enables the connection to the network.

The docking station has a USB Type-C Power Delivery port to connect the power supply of the laptop or tablet to charge it. In addition it also supplies the USB ports with power. The docking station can also be used without a power supply.

As soon as the docking station is connected via the USB-C plug, an LED at the bottom edge lights up in a unique design.

Due to its small dimensions and its sturdy housing, this Delock docking station is particularly suitable for travelling. It can simply be packed into the bag together with the laptop or tablet and used as needed.

- Connectors: 1x USB Type-C male, 3x USB 3.0 Type-A female, 1x HDMI-A female, 1x Gigabit LAN 10/100/1000 Mbps RJ45 jack, 1x USB Type-C female (power supply)
