Walli Dimmer

from **56,10 EUR**

Item no.: 357980
shipping weight: 0.50 kg
Manufacturer: Fibaro

Product Description

With the FIBARO Walli Dimmer, you always adjust your lighting to the respective occasion. The small flush-mounted module is combined with a visually appealing switch that can be used to dim the existing lighting.

The small FIBARO Walli Dimmer measures both the active power and the energy consumption and converts this into a visual signal by means of the LED ring.

Installation is child's play and can be carried out according to your individual wishes.

The FIBARO Walli Dimmer can be used for the following lamps:

- conventional incandescent lamps and halogen lamps
- ELV halogen lamps and dimmable LED lamps (with electronic transformers)
- LV halogen lamps (with ferromagnetic transformers)
- dimmable LED lamps
- dimmable compact fluorescent lamps CFL tube
- Dimmer for existing lighting systems
- Scene control
- Can be used with FIBARO Bypass 2
- Power supply: 110 - 230V, 50/60Hz
- Safety: S2
- SmartStart capable
- Radio technology: Z-Wave Plus
