

Item no.: 362077

USB Bluetooth 5.0 Adapter in Micro Design

from **13,23 EUR**

Item no.: 362077
shipping weight: 0.10 kg
Manufacturer: Delock

Product Description

The USB Bluetooth adapter from Delock enables wireless communication and data transfer, e.g. between two PCs or a PC and a mobile phone or network. The Bluetooth adapter can remain connected to the notebook at all times, as it only protrudes approx. 5 mm from the USB connection.

Bluetooth 5.0 Thanks to the Bluetooth 5.0 standard, this adapter requires less power and has a faster data transfer rate. Furthermore, it is very easy to pair with the end devices. Without a barrier between transmitter and receiver, connections of up to 200 metres are possible outdoors. And all this with a transmission power of 100 mW. In addition, data packets can now be up to 255 bytes in size, instead of 31 bytes as before.

IoT The Internet of Things (IoT) is the generic term for the networking of intelligent objects. Communication takes place both among each other and with the Internet. The goal is for the object, e.g. the Hoover robot, to continuously provide status information on the Internet, which can then be called up and controlled with the help of an app. Thanks to its low power consumption and greater data transmission rate, Bluetooth 5 meets all communication requirements and is therefore ideal for smart home devices of the IoT (Internet of Things).

Specification

- Connection: 1 x USB 1.1 type-A plug
- Chipset: Realtek RTL8761BUV
- Bluetooth Standard 5.0 Dual Mode + EDR + BLE
- Class 2, range up to 20 metres
- Frequency range: 2.4 - 2.4835 GHz
- Data transfer rate up to 3 Mbps
- Dimensions (LxWxH): approx. 19 x 13 x 6 mm

System requirements

- Windows 8.1/8.1-64/10/10-64
- PC or notebook with a free USB type-A port

Package contents

- USB Bluetooth adapter
- Instruction manual
