

Item no.: 358003

Smart Button, Smart Home Control

from **34,20 EUR**

Item no.: 358003
shipping weight: 0.50 kg
Manufacturer: frient

Product Description

Imagine you have a friend (frient) with whom you can easily control your home. A frient that turns off all the lights in your home and locks your front door with just one click. Someone to make your life more comfortable and save you time.

The frient Smart Button takes turning connected devices on and off to a new level. The double-sided adhesive tape allows you to install the button anywhere. For example, place the button right next to your sofa to dim your lights or mount the smart device right next to your front door to turn connected devices on or off with one click. For more comfort, you can also install the button next to your bed to switch off the light and the TV without having to get up. Thanks to the splash water protection, the button can also be placed in the kitchen or bathroom without any problems.

The frient Smart Button controls your entire Smart Home with just one click. Simply programme automations in your Smart Home Hub so that the lights come on, your favourite music plays and the blinds open as soon as you get up. In the evening, the frient Smart Button puts your home into night mode by locking the door and turning off all the lights. It also checks that all windows are closed. The button will do exactly what you want it to do.

Features:

- Dimensions: 40 x 53 x 10.8 mm
- Power supply: Battery CR2450, replaceable
- Battery life: up to 3 years
- Battery level is transmitted to gateway via Zigbee
- Ambient temperature: 0 to +50°C
- IP class: IP44
- Ambient humidity 5% to 85
