

Item no.: 358001

Heat detector (Zigbee)

from **44,05 EUR**

Item no.: 358001
shipping weight: 0.50 kg
Manufacturer: frient

Product Description

Fire or just smoke? Imagine always having a friend (frient) to protect you from fire. Someone who protects your home and your loved ones. A frient who ensures that you are immediately alerted via app in the event of a fire.

Avoid false alarms. Do you have a fireplace in your living room or a dusty storage room and your smoke alarm keeps going off by mistake? Don't despair, your frient will help you. The frient intelligent heat alarm detects heat instead of smoke and thus avoids false smoke alarms. This means you will only be alerted if a fire has really broken out in your home. So in future you can enjoy the evening in front of the fireplace - without annoying beeps.

Don't let yourself be disturbed in the kitchen. Are you a master chef cooking a delicious meal for your family? You prepare 5 things at once, have food in the oven as well as on the cooker and everything is under control. Suddenly you hear the unpleasant alarm sound of your smoke detector, which won't stop. It has mistakenly identified the smoke from your master dish as a fire. Your friend heat detector helps you avoid exactly this problem.

Properties

- Dimensions: Ø 65 x 40 mm
- Power supply: Battery 1 x CR123A, replaceable
- Battery life: 5 years, reporting every 5 minutes
- Battery level and low battery warning can be sent
- Radio sensitivity: -98 dBm
- Radio output power: +8 dBm
- IP class: IP20
- Operating temperature 0 to +50°C
- Relative humidity up to 95% non-condensing
- Heat-based fire detection (>57°C)
- Siren output 85 dB/3m
- Temperature sensor range: 0 to +50°C
- Temperature resolution: 0.1°C (accuracy ± 0.5°C)
- Zigbee 3.0
- Complies with CE, RoHS and REACH directives
- DIN EN 14604 and DIN 14676 certified
