🖹 Product Description

faytech's capacitive PC series stands out from the competition thanks to its fanless operation, IP65 front design, high reliability and elegant finish.The touch PC models have a modern and elegant appearance. Thanks to the edge-to-edge glass surface with faytech's patented silicone frame, the front is protected from water and dirt and therefore fulfils the IP65 standard. In combination with the VESA 100 holes (VESA 400 for 32"+), the aluminium housing back offers the option of attaching the PC securely to various surfaces.The heart of this capacitive touch PC is the extremely powerful Kaby Lake U industrial mainboard. The touch PC is powered by an Intel® Core™ i5-7300U processor with up to 2.60 GHz, 8GB RAM, a 128GB SSD and Intel®'s HD Graphcs chipset.faytech PCs are the best choice for a wide range of applications, such as POS or kiosk systems in retail, machine control in the industrial sector or digital signage in shopping centres and hotels.
