Product Description

The capacitive touch monitors from faytech have a modern, sleek look with their flat, borderless glass fronts, which are IP65 water and dust resistant. These devices have capacitive 10-finger multi-touch, a glass front that reaches up to MosH 7, the glass surface is anti-reflective (chemical etching) and a variety of connections. All monitors have VESA 75 or VESA 100 screw patterns on the back, while the 12.1? to 21.5? monitors come with their own desk stand. Each unit has an optically bonded touch panel that improves stability, reduces reflection, increases viewing angle and increases perceived brightness. It also provides resistance to dust particles and generally displays a better image. It is the perfect choice for a variety of applications, including industrial automation, control panels and digital signage.Our touch monitors are the perfect choice for a variety of applications, such as POS systems, control panels in industrial areas, kiosk systems, office/home automation, digital signage and in areas such as shopping centres, classrooms, hotels and many more.
