USB 3.0 docking and cloning station for 5 x 2.5" SATA HDD / SSD

from **119,21 EUR**

Item no.: 361783
shipping weight: 0.90 kg
Manufacturer: Delock

Product Description

This HDD / SSD docking station from Delock is used for the external connection of up to five 2.5" SATA HDDs / SSDs via the USB interface, as well as the simple exchange of the drives through hot swap. This solution means that no external housing is required, as the HDD / SSD is inserted directly into the docking station.

Up to five HDDs or SSDs can be inserted and accessed simultaneously.

With the clone function, the contents of an HDD / SSD can be copied to one or more (up to four) hard drives without using a PC.

Due to the USB connection and the included USB cable, the docking station can be easily connected to the computer. In addition, the power supply unit included in the scope of delivery ensures a sufficient power supply for the storage devices used.

With the help of the optional accessories, mSATA, M.2 (Key B - SATA) or CFast memory can also be operated on the Delocking and Cloning Station.
