### Product Description

With this charging pad by Delock, a mobile device can be charged wirelessly. No charging cables are required for energy transfer via induction and the connectors are protected. The charger supports fast charging up to 15 watts for appropriately equipped smartphones. Backwards compatible. In addition to max. 15 W, the charging surfaces also charge at 5 W, 7.5 W and 10 W and are therefore also suitable for devices that support wireless charging with lower power. For example, watches, headphones, charging cases or similar.
