shipping weight: 0.10 kg
Manufacturer: Delock

Product Description

Delock Experimental Mini Breadboard 170 contacts red

This experimental breadboard by Delock enables a fast solderless assembly of small electronic circuits. The circuit can be changed by simply repositioning the components.

- This breadboard is suitable for e.g. Arduino shield prototyping, switching tests and various PCB projects.
- For example, transistors, diodes, LEDs and capacitors can be mounted.
- The breadboards are often used in the hobby sector, in the laboratory, in industry and also at schools or universities, as the assembly is quick and no soldering is necessary.
- The experimental breadboards have an adhesive sticker on the bottom side, to mount it easily to any smooth surface and removed without leaving any residue. Optionally, the breadboards can also be fastened with two screws.
- Terminal strip: 170 contacts
- self-adhesive
- Material: plastic
- Colour: red
- Dimensions (LxWxH): ca. 46 x 36 x 10 mm
- Package content: Experimental breadboard, 2 x screw
