shipping weight: 6.00 kg
Manufacturer: Triton

Product Description

Triton RAC-DT-S01-X1 - Aisle roof W600xH100 mm, aisle width 1200 mm

The aisle roof is made of a clear safety glass in a metallic frame. The ceiling shape allows the air to flow smoothly. Macrolon filling of the metallic frame is available upon request. We offer 1200 mm wide roofs for aisles with a width from 300 mm to 800 mm.

New to the range of products are sliding roofs, providing access to cable trays, as well as self-opening roofs which in case of fire enable the extinguishing gas to enter the data center immediately.

- Width of roof panel: 600 mm
