### Product Description

This RGB cable from Delock can be used on various motherboards, e.g. Gigabyte, MSI or ASRock, to connect LED lighting. The two 3-pin sockets allow the cable to be connected to the standard 3-pin connector or the 3-pin "VDG" connector for the addressable RGBs. The arrow on the socket indicates the correct insertion direction. This cable is mainly used in gaming or case modding applications. **Note** The cable is only suitable for 5 V LED lighting.
