Product Description

Wireless Instruments WiOmni245-7V - Dual Band Omni Antenna (without Enclosure) WiOmni 245-7V is an omnidirectional, concurrent panel mount antenna. The antenna is for the omnidirectional data distribution like hotspots or small cells in outdoor environments. The system comes with a type N male connector and is designed to be mounted on a type N female connector on the BOXes. WiOmni 245-7V is intended, among others, for being installed in WiBOX Medium, Large and Extra Large IP67 enclosures. The antenna doesn't come with a WiBOX enclosure, the photo is for demonstrative purposes only.
