Product Description

Should high-quality 100 Gigabit connectivity be limited to indoors only? Definitely not! That's why we created the CRS504-4XQ-OUT: a versatile, cost-effective, ultra-fast weatherproof switch for all your outdoor needs.

At the core of this masterpiece, we have an incredible Marvell Prestera switch chip. And there are four 100 Gigabit QSFP28 ports. Use them to connect other 100 Gigabit devices or grab a breakout cable to connect multiple 25 Gigabit devices. Here's where the speedy switch chip really shines: each port is connected to four 25 Gigabit lines. That means you're getting up to 16 high-speed fiber interfaces from a single outdoor switch! You can mix and match all kinds of connections this way: 100 Gigabits on one port, 40 Gigabits on the other, 4x25 Gigabits on the third, and maybe even some 10G or 1G cables on the fourth. And all this versatility comes in a sturdy, weatherproof IP66-rated enclosure. This rating proves it's strong enough to handle powerful water jets from any direction!
