

Item no.: 382919

20938 - Braided sleeving for EMI shielding, expandable 10 m x 10 mm

from **29,69 EUR**

Item no.: 382919 shipping weight: 0.30 kg Manufacturer: Delock

Product Description

This braided sleeving by Delock is ideal for shielding and bundling exposed cables or electrical lines. Shielding by polyester and copper braiding The braided sleeving is made of polyester, which offers high abrasion resistance, and a copper protective fabric to protect cables and devices from electromagnetic interference. This interference can affect electrical devices and should therefore be avoided by shielding. High flexibility and excellent resistanceThe copper braid has a high degree of flexibility to protect cables from excessive bending. The conduit is also characterised by its elasticity, which allows it to accommodate multiple cables or wires with different diameters. Thanks to the firm fabric structure, the cables are protected from the effects of weather and damage.

Specification- Length: approx. 10 m- Diameter: approx. 10 mm- Cable diameter:min.: 7 mmmax.: 12 mm- Copper braiding- EMI shielding- Stretchable- Ambient temperature: -50 °C ~ 150 °C- Material: polyester / tinned copper
