

Item no.: 383148

19004 - Cable conduit made of glass fibre braiding and aluminium 2 m x 20 mm

from **8,81 EUR**

Item no.: 383148
shipping weight: 0.20 kg
Manufacturer: Delock

Product Description

This protective conduit by Delock is used to protect cables, electrical lines or wires. Excellent resistance thanks to glass fibre braiding and aluminium foil. The conduit protects cables from high temperatures and solar radiation. The aluminium reflects more than 95 % of the radiation that hits its surface and keeps the underlying cables, hoses and wires cool. Specification- Length: approx. 2 m- Diameter: approx. 20 mm- Operating temperature: -40 °C ~ 200 °C- Inner material: glass fibre- Outer material: aluminium- Colour: silver Package contents- Cable conduit Packaging- Resealable bag
