ZMEAUZB1 - UZB Smart Home Stick (AUS frequency)

from **36,95 EUR**

Item no.: 327390
shipping weight: 0.10 kg
Manufacturer: Z-Wave.me

Product Description

UZB Smart Home Stick (AUS frequency)

The Z-Wave.Me UZB stick can be plugged into a PC, Notebook, Barebone, Raspberry Pi or similar platform and create a Z-Wave network via its integrated antenna. This way, the PC will become a Z-Wave smart home control center. A third-party controller software, compatible to the Sigma Designs Serial API, is required to use the functions of the device. The third-party software plus this UZB realize a static controller to manage and use Z-Wave devices of various vendors. This stick works with all certified Z-Wave devices regardless of its vendor or date of origin. The Sigma Designs Serial API specification is available to all owners of a Sigma Designs Z-Wave SDK. Please note that this product does not contain a license to run Z-Wave.Me's Z-Way – the first certified Z-Wave controller software. You can however purchase the needed license (ZME_ZWAYLIC1) to use the Z-Wave.Me controller software.

ATTENTION: Use of this device may be restricted or prohibited in some countries due to the frequency ranges used. Please inform yourself at the authority responsible for your country.
