

Item no.: 358023

Multipurpose Sensor (Zigbee)

from **28,06 EUR**

Item no.: 358023
shipping weight: 0.50 kg
Manufacturer: Aeotec

Product Description

Always stay informed: The Aeotec Multipurpose Sensor can be inconspicuously and easily attached to many doors and windows. Via the associated SmartThings app, you not only receive information about which windows or doors are open, but also a direct notification if they are opened unexpectedly.

Vibration detection: Don't miss anything anymore. The built-in acceleration sensor also registers slight vibrations so that the SmartThings app can tell you when there is a knock at the door - no matter where you are.

Feel-good atmosphere in your home: From now on, you will always know when the temperature in your home changes - your smart devices will take care of the rest. With the SmartThings app, you can see the temperature in real time and, with the help of your air conditioning, heating and other smart devices, you can once again create a cosy atmosphere in your home.

Simply smart: exploit the full potential of the Aeotec Multipurpose Sensor and make it part of your automations. The Aeotec Multipurpose Sensor detects open windows so that the smart thermostat automatically reduces your heating output. This saves you money.

Important: To be able to use all functions, you also need an Aeotec Smart Home Hub or other Zigbee Hub.

- Monitoring of doors with magnetic reed sensor and acceleration sensor
- Temperature control
- Simple installation with 3M adhesive tape
- Aeotec Smart Home Hub or other Zigbee Hub additionally required
- Power supply: CR2450 battery
- Zigbee 3.0
- Regions: EU
- Certifications: Zigbee, FCC/IC/CE
- Scope of delivery: Aeotec Multipurpose Sensor, quick start guide, battery CR2450
