Product Description

This book is in English

Z-Wave is the leading international standard for wireless communication in smart homes. Different products from different suppliers work together and interact in a single network to provide smart lighting, security and energy efficiency. This book describes everything you need to know about Z-Wave: The frequency is standardised by the international organisation ITU, which implements the networking between devices to ensure stable communication and finally the device-specific functions of the application that ensures interoperability between different devices. A practical guide for installing and troubleshooting wireless networks is also provided.
