## EB6729 - Raspberry Pi compute module EA board

from **146,56 EUR**

Item no.: 384293

shipping weight: 0.10 kg

Manufacturer: Raspberry Pi Foundation

### Product Description

The Compute Module IO Board V3 is designed for use with the Raspberry Pi Compute Modules:- CM1(826-8825)- CM3(123-2011)- CM3L(123-2012) This I/O breakout board plugs into the Compute Module to allow access to various ports that you would see on the traditional Raspberry Pi boards. Why do I need this? "You can use the CM3 I/O board as an adapter to set up your Compute Module. The compute modules themselves don't have connectors on board, they are designed to be plugged into applications, which is where the CM3 I/O board comes in. It has all the things that are harder to add already on the board. There is also the option to add additional components if you need them. What's on the CM3 I/O board? 20 GPIO pins HDMI port USB port 2 camera ports 2 display ports. Please note that the item images are for better representation of the product. The actual scope of delivery may differ from the product image and can be found in the description.
