Product Description

A digital timer that allows you to set the time for switching electrical devices on and off. For example, it can control the operation of the electrical equipment of an aquarium or terrarium, the operation of water heaters, lighting and many other devices. The timer has 10 on/off programmes and can be freely programmed, e.g. for a specific day or the whole week. Possibility to work 24 hours a day as well as weekly. The timer is designed for both indoor and outdoor use. 10 programmes to be used, countdown and random activation function. The maximum load is 3600 W. Only our programmer has so many programmes! 10 on/off programmes on 7 days a week result in up to 140 programmes per week! No other programmer on the market at this price can offer the random on/off function. The on and off times can be set for each day of the week, the shortest changeover time is one minute. The timer has a built-in battery that retains the settings if the power fails or the plug is removed from the socket. The programmer fits into Polish sockets with earthing pin. Manual in Polish language included. Specification- Maximum load: 16 A, 3600 W- CE certificate- Voltage: 220-240 VAC 50 Hz- Waterproof housing- Operating temperature -10°C ~ 40°C- Earthing pin and child safety lock- Manual in PolishSet includes- External digital timer Maclean Energy MCE08- Manual user instructions- Manufacturer's packagingFeatures- It is characterised by high resistance and durability.
