## Product Description

A high-quality wall light with motion sensor from a leading European manufacturer of intelligent lighting. The device can be operated both at night and during the day. The TIME knob is used to set the lighting duration (from about 10 seconds to 5 minutes). The LUX rotary knob is used to set the sensitivity of the ambient light (range from 3 to 2000 LUX). Simple setting! If the ambient light is not sufficient and the device is to work both day and night, set the rotary knob to the day position (sun symbol). If the ambient light is less than 3 LUX, set the rotary knob to the night position (moon symbol). Ensure the safety of your loved ones! Proper lighting of the property - paths, driveway, stairs or house entrance - increases the safety of the occupants. Good lighting is also an effective means of discouraging and deterring burglars. After all, it is difficult to remain invisible against the backdrop of illuminated walls.

Technical data- Power source: 110-240 V/AC- Detection angle: 180°- Mains frequency: 50/60 Hz- Maximum range: 9 m (<24°C)- Illumination sensitivity range: <3-2000 LUX (adjustable)- Protection class: IP44 (ATTENTION: the lamp must not come into direct contact with precipitation!)- Operating temperature: -20/+40°C- Lighting duration range: 10 sec to 5 min- Also works with LED bulbs- Operating humidity: <93%RH- Installation height: 1.8-2 m- Maximum power: 60 W (E27)- Motion detection speed: 0.5-1.5 m/s- Dimensions: 265 x 185 x 100 mm Set includes- Wall light with PIR sensor Maclean MCE33B- Mounting kit- Original manufacturer's packaging- User manual in Polish Features- Maximum power: 60 W (E27)- Detection angle: 180°- Maximum range: 9 m (<24°C)- Protection rating: IP44- Also works with LED lamps
