shipping weight: 0.10 kg
Manufacturer: Maclean Brackets

Product Description

The luminaire is equipped with front and rear LED lighting. You decide which one you use! The front light has 5 SMD LEDs with a brightness of 50 lumens, while the rear light consists of 6 SMD LEDs with a brightness of 60 lumens. Battery-powered mini LED light provides soft light. Thanks to the built-in motion sensor, the lamp does not light up all the time, but lights up for about 30 seconds when it detects movement in the vicinity (in AUTO mode). In addition, thanks to the twilight sensor, the lamp only reacts to movement in the dark. Sensor light - lights up automatically when it detects movement in its surroundings. This small lamp provides a sense of security in any room! The lamp with LED light is an extremely energy-efficient solution - it consumes very little energy and the LEDs used ensure several years of operation without needing to be replaced. Ideal for living rooms, hallways, bedrooms, children's rooms, kitchens, bathrooms and other rooms. 360° rotating magnetic base. The strong 360° rotating magnetic base included with the lamp allows you to change the position of the lamp as you wish. You can also remove the lamp at any time and use it elsewhere - a very practical solution.

Specification- LED lamp with PIR sensor- Batteries: 3 x AAA (not included)- ON/AUTO/OFF switch- Operating time when motion is detected: 30 seconds- 360° rotatable magnetic base- Built-in twilight sensor- Front lighting 5 SMD LED 50 lumens- Rear lighting 6 SMD LED 60 lumens- Dimensions with handle: 90 x 55 mm- Colour: white. Set contains- LED light with motion sensor, rear lighting Maclean Energy MCE223- Magnetic holder- Mounting kit (two screws, dowels, mounting tape)- Original packaging. Features- Cordless light with motion sensor- Extremely practical- Light colour: natural/daily- Very low energy consumption- Front or rear light!
