Item no.: 358026
Outlet Type F (Zigbee)

from **42,98 EUR**

Item no.: 358026
shipping weight: 0.50 kg
Manufacturer: Aeotec

📄 Product Description

The Aeotec Outlet Type F (Zigbee) can switch electrical devices on or off. This allows you to integrate devices into your Smart Home network, controlling their power supply.

For example, use the Aeotec radio-controlled socket to automatically switch your fan on and off according to a daily schedule or in conjunction with a temperature sensor. Simply connect the Aeotec outlet to your Smart Home Hub and enjoy the full convenience and functionality of the SmartThings app.

The Aeotec Outlet Type F is simply plugged in between the normal socket and the plug of the device. Control the outlet via the SmartThings app or simply with your voice assistant from home or on the go.

With the SmartThings app, you can control how much power your connected devices use in real time. To save energy, you can automatically switch off connected devices at predefined times.

Each SmartThing adapter plug is also a repeater that can repeat signals from other Zigbee devices and expand your Smart Home network.

- Control of the power supply of non-Smart Home devices
- Max. Load: 2500 watts
- Energy measurement function in watts
- Wireless radio technology: Zigbee 3.0
- Zigbee repeater function for extending the Zigbee network
- Retrieve information about the power consumption of the connected electrical appliances
- Status LED
- Convenient control via SmartThings through the Aeotec Smart Home Hub
