from **11,71 EUR**

Item no.: 384225

shipping weight: 0.20 kg

Manufacturer: Raspberry Pi Foundation

Product Description

The official Raspberry Pi 4 USB Type-C plug-in power supply provides sufficient power (15W) for the new Pi4 board with its 5V voltage and 3A current. It is specially designed for the Raspberry Pi 4 Model B and cannot be used with older models of the Raspberry Pi. The housing is made of robust plastic in white, the cable length is approx. 1.5 metres. This means you can easily reach the nearest power socket. Product details:- especially for Raspberry Pi 4 model B- output via USB Type-C - 5Volt and 3 Ampere (15W) - approx. 1.5 metre MicroUSB cable- integrated protection against short circuit, overload and overvoltage- low standby power consumption- double, class II insulated housing- ErP efficiency level V- officially approved by the Raspberry Pi Foundation! Included in delivery:- USB Type-C plug-in power supply for Europe! Please note that previous standard Micro USB plug-in power supplies can no longer be used for the new development and experimentation single-board computer "Raspberry Pi 4 Model B"! This power supply is not suitable for the previous models of the RPi4!
