Product Description

UXG-Pro-EU - Next-generation Gateway Pro

The UniFi Next-generation Gateway Pro (UXG Pro) is a powerful security gateway that delivers a versatile networking interface and enterprise-class threat management functionality to medium to large-sized networks. The UXG Pro is equipped with 2x WAN ports (GbE RJ45 and 10G SFP+) that provide failover support, as well as 2x LAN ports (GbE RJ45 and 10G SFP+) to provide the high-speed connectivity needed to support the most bandwidth-intensive applications. It also excels as a complete network security solution, offering a full suite of threat mitigation features, including deep packet inspection (DPI), intrusion detection and prevention systems (IDS/IPS), and layered firewall configuration. The UXG Pro can be paired with a Cloud Key Plus to create a highly powerful and secure deployment that can be fully managed with the UniFi Network application (web/mobile).
