

Item no.: 384760

LIC-IPS-DEVICE-RENEW-1Y-1N-MR - 1-year device-based IPS renewal license

from 457,20 EUR

Item no.: 384760 shipping weight: 0.00 kg Manufacturer: MOXA

Product Description

IntroductionMXsecurity is a management platform that provides centralized visibility and security management to easily monitor and identify cyberthreats and prevents security misconfigurations to create a robust threat defense. This industrial network security management suite translates complex network activity and threat intelligence into real-time visibility of cybersecurity statuses and actionable management for better detection and reaction against cyberthreats. With real-time dashboards, MXsecurity helps users track and react to OT network security events more efficiently. Centralized ManagementManage and monitor your firewall deployments from one central location for better administration and maintenance. Devices can also be managed in groups based on geographic location, function, or responsibility to increase management efficiency. Unified, Error-free Mass DeploymentHuman error can lead to costly security breaches. Unified deployment of firewall policies, firmware upgrades, device configurations, and signature updates prevents configuration errors and ensures your network is protected with the latest security intelligence.Real-time MonitoringMXsecurity provides at-a-glance visibility, showing real-time network activity and threat analysis through highly customizable interactive widgets and a flexible dashboard. Event Logs and Email NotificationsMXsecurity automatically aggregates and monitors security logs at the appliance level and sends customizable instant real-time email notifications for more efficient monitoring and faster troubleshooting. Map View for Real-time Location MonitoringSecurity devices are deployed in all kinds of scattered environments and applications, such as in factories or on moving vehicles. With the Map View feature, administrators can instantly identify the physical location and status of all managed security assets for easy monitoring and troubleshooting. Scheduled Batch Deployments and ReportsThe scheduling feature allows users to perform various types of batch updates inclu
