## Product Description

The harness allows you to mount a GoPro camera or phone on your chest. They can be used by both women and men, people with a small figure and well-built people. All this thanks to a wide range of adjustments and high flexibility of the fastening straps. The harnesses are made of high-quality plastic and flexible rubber, which guarantees their very high quality and ergonomics. A great solution for people looking for a replacement for Chest Mount Harness. The built-in mirror makes it easier to position yourself in the camera frame, so your materials will always be of high quality. The holder is compatible with phones with a width of 75 mm to 100 mm and a height of 140 to 180 mm, and the built-in special locking system guarantees that your smartphone will be stably mounted on the holder. The harness has length adjustment buckles, so you can adjust its length to your body shape. Convenience of recording Harnesses that enable mounting a smartphone, camera, GoPro camera and other devices on the chest are an excellent option for active people who need a solution that allows them to record their sports activities without having to hold the device in their hand or attach it to a helmet. The huge range of adjustments, small dimensions and modest weight mean that every user will not even feel that they are wearing a harness with the device installed.
