4384 - snom A210 Wifi Dongle

from **32,72 EUR**

Item no.: 386298

shipping weight: 0.10 kg

Manufacturer: Snom Technology GmbH

Product Description

Integrate Snom telephones into the network at almost any location using WLANThe Snom A210WLAN USB dongle turns any current Snom telephone from the D3xx and D7xx series with a USB port into a WLAN-capable device, as offices are increasingly reliant on being able to connect devices on the move and with as few cables as possible. The dongle is specially designed and optimised for Snom telephones, i.e. no complicated operation or, in the worst case, even connection interruptions when using third-party dongles. The small, handy dongle is simply connected via the USB port of the Snom telephone and can be configured directly via the telephone. Once connected to the local WLAN, you can use all the functions of the device as usual - just like with a cable! Features - Adds a WiFi option to your desk phone - Wireless telephony everywhere - Encryption: WPA-PSK/WPA2-PSK; WPA/WPA2; WEP
