4387 - snom A170 Headset

from **156,62 EUR**

Item no.: 386330

shipping weight: 0.70 kg

Manufacturer: Snom Technology GmbH

Product Description

Comfortable headset with 3 wearing options The wireless Snom A170 is a headset for Snom telephones that offers the highest quality and special mobility, because thanks to the DECT radio technology, a movement radius of up to 25m is possible. The lightweight and handy headset has a broadband speaker and a microphone with passive "noise cancelling", which simply filters out disturbing ambient noise. The headset offers three wearing options: Either by headband or neckband or directly on the ear. It has integrated EHS functionality. At the touch of a button, the most important functions such as call acceptance, microphone mute or volume can be controlled directly on the headset. And if the day is full of phone calls, the battery, which has been charged in the Snom A170 base station in the meantime, can be changed at any time, even during ongoing calls. In principle, this makes it possible to make unlimited hands-free calls. The Snom A170 is compatible with the Snom D7xx and D3xx series desk phones and can also be connected to a PC via the base station's integrated USB port. Simply press a button on the base station to conveniently switch between the phone and the PC. Features- Wireless DECT headset- Can be connected to Snom phone or PC (USB)- Passive "noise cancelling" microphone- Battery can be replaced during a call
