shipping weight: 2.20 kg

Manufacturer: Snom Technology GmbH

Product Description

The modern conference solution for companies of all sizesThe Snom C520is the perfect companion for collaborative teamwork. The modern conference phone has three sophisticated microphones. One microphone is built into the device together with the powerful full-duplex loudspeaker. Two further cordless DECT microphones can be positioned or worn anywhere in the room. The microphones of the Snom C520 feature dynamic noise cancellation and adaptive feedback control for crystal-clear HD voice transmission even with many people or in large rooms. To ensure optimum coverage, the microphones synchronise in real time depending on their position in the room. This technology allows users to move freely around the room without having to raise their voice. The range of the device can also be extended wirelessly by up to three Snom C52-SP extension speakers (microphone included) to cover even very large rooms. The Snom C520 also has a Bluetooth interface which you can use to pair a Bluetooth headset or connect to a PC to combine the Snom C520 with the participants in a conference solution running on the computer. This allows those present in the room to use the Snom C520 to talk to the participants of any meeting software on the PC. Technical features- Bluetooth:This device has Bluetooth headset support. - Headset connectable:This device has a connection and possibly software support that allows a headset to be connected. - Security(TLS & SRTP):This device supports all common security protocols, such as TLS, SIPS, SRTP, etc.Features- 2 detachable wireless microphones - Bluetooth connection - Expandable with up to three C52-SP
