120° Sector Kit 5 GHz - small

14,78 EUR

Item no.: USK1205
shipping weight: 1.70 kg
Manufacturer: RF Armor

Product Description

120° Sector Kit 5 GHz - small

Reduces unwanted RF energy from the back, sides, top and bottom outside the desired beam width from reaching the antenna and radio keeping the radio focused on signals only from the desired coverage area. The kit will NOT increase the gain of the antenna, however it will lower the noise floor providing a much cleaner signal allowing for higher sustainable air rates.

Protects the Rocket and its jumpers from the elements by completely encasing it within an aluminum box. These kits are 4th generation made from marine grade aluminum and have been refined based on customer feed back and extensive testing.

Specifications

Fits the following Ubiquiti devices:

AMS 5G-120-16 (5 GHz 120 degree 16 dB)Measurements:

Kit height: 16 1/4 inches

Kit width: 6 3/4 inches

Kit weight: 2 pounds 10 ounces
